Product Categories and Modules of Appointment

Product categories	***Assessment Procedure as defined in Schedule 2 of the Regulations***
The following categories of machine specified in ***Schedule 2, Part 4*** of the regulations: 1. Circular saws (single- or multi-blade) for working with wood and material with similar physical characteristics or for working with meat and material with similar physical characteristics, of the following types: 1.1. sawing machinery with fixed blade(s) during cutting, having a fixed bed or support with manual feed of the workpiece or with a demountable power feed; 1.2. sawing machinery with fixed blade(s) during cutting, having a manually operated reciprocating saw-bench or carriage; 1.3. sawing machinery with fixed blade(s) during cutting, having a built-in mechanical feed device for the workpieces, with manual loading and/or unloading; 1.4. sawing machinery with movable blade(s) during cutting, having mechanical movement of the blade, with manual loading and/or unloading. 4. Band saws with manual loading and/or unloading for working with wood and material with similar physical characteristics of the following types: 4.1 sawing machinery with blades(s) during cutting, having a fixed or reciprocating-movement bed or support for the workpiece; 4.2 sawing machinery with blades assembled on a carriage with reciprocating motion. 5. Combined machinery of the type referred to in points 1 to 4 and point 7 of Schedule 2, Part 4, for working with wood and material with similar physical characteristics. 8. Portable chainsaws for woodworking. 10. Injection or compression plastics-moulding machinery with manual loading or unloading. 11. Injection or compression moulding rubber-moulding machinery with manual loading or unloading. 12. Machinery for underground working of the following types: 12.1 locomotives and brake-vans; 12.2 hydraulic powered roof supports.	**Part 9** Type examination

13. Manually loaded trucks for the collection of household refuse incorporating a compression mechanism.

16. Vehicle servicing lifts.

17. Devices for the lifting of persons or of persons and goods involving a hazard of more than three metres.

19. Protective devices designed to detect the presence of persons.

20. Power-operated interlocking movable guards designed to be used as safeguards in machinery in points 9, 10 and 11 above.

21. Logic units to ensure safety functions.

22. Roll-over protective structures (ROPS).

23. Falling-object protective structures (FOPS).
